Wesley Vance Blair

Project Overview

➤ Inspiration:

- Instagram
- Design Games

➤ Main Points of Focus

- User authentication
- Post creation & manipulation
- Contest creation & manipulation
- Comments

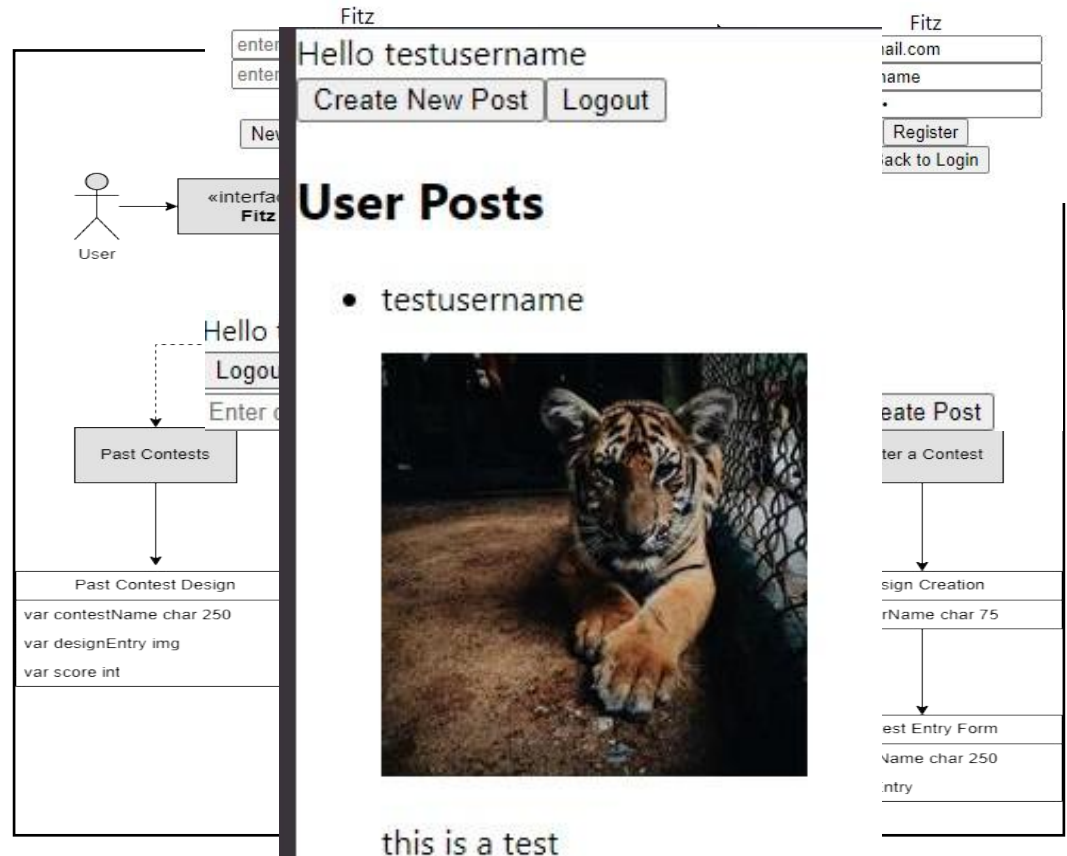

A social media fashion design platform for posting and entering contests

Proposed Functionalities

- User Authentication
- Post creation
- Commenting
- Contest creation
- Contest entry
- Voting on submitted entries
- Contest closure
 - Contests no longer accept entries or votes

Phase 1

- Social Media elements
 - Posts
 - Comments
- Contests
 - Voting aspect not achieved
 - Contest design and structure established

Phase 2

- Contests
 - Schema
- Comments for posts
 - Creation
 - Updates
 - Retrieval
 - Removal

import mongoose from "mongoose";

const commentSchema = new mongoose.Schema({
  text: {
    type: String,
    required: true,
  },
  username: {
    type: String,
    required: true,
  }
});

const postSchema = mongoose.Schema({
  username: String,
  image: String,
  caption: String,
  comments: [commentSchema],
  status: String,
});

const PostModel = mongoose.model("Posts", postSchema);

export { PostModel };
```

Challenges

- Order of development
 - Voting was unable to be done
- User interface focus
 - Current simplistic design
 - Minimal CSS
 - Not very user friendly
